PHYSICA A

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/EI Compendex Plus/Engineering Index/INSPEC/Physics Briefs

Volume 222, Nos. 1–4 **15 December 1995**

Contents

Random systems

Discrete spin cubic model on a fractal lattice – the ground state phase diagram
Z. Borjan, M. Knežević and S. Milošević 1

Fluids, solids, interfaces and supramolecular fluids

Depletion force in colloidal systems
Y. Mao, M.E. Cates and H.N.W. Lekkerkerker 10

An approximate calculation on the elastic constants of a solid containing varying volume fractions of cavities
K.D. Pithia 25

A note on the initial condition for the formation of foams
K.D. Pithia 32

A general interaction potential model between plateau borders to determine the strain rate of liquid foams
K.D. Pithia 35

The complex susceptibility of liquid water as a two-potential system of reorienting polar molecules
V.I. Gaiduk, V.V. Gaiduk and J. McConnell 46

Semiclassical collision model for rotating molecules. Application to light-induced drift
L.V. Il'ichov, P.L. Chapovsky and L.J.F. Hermans 63

The kinetics of powder settlement caused by low level vibration and elastic stresses
Y. Boguslavskii and S. Drabkin 75

Thermal hydrodynamic fluctuations of polymer globules
A.V. Zvelindovsky and D. Bedeaux 87

Boltzmann cellular automata studies of the spinodal decomposition
R.B. Rybka, M. Cieplak and D. Salin 105

Critical phenomena of the hard-sphere lattice gas on the simple cubic lattice
A. Yamagata 119

Dynamical processes

Units: remarkable points in dynamical systems
J.A.C. Gallas 125

Exact shapes of random walks in two dimensions
G. Wei 152

New approaches to shapes of arbitrary random walks
G. Wei 155

PHYSICA A
Volume 222, Nos. 1–4 **15 December 1995**

Contents (continued)

Onsager's symmetry in the Burnett regime
M.B. Romero and R.M. Velasco 161

A quantum map for a kicked spin 1 in an oscillator reservoir
S.M. Gatica and E.S. Hernández 173

Statistics of the burst model at super-critical phase
T.C. Chan, H.F. Chau and K.S. Cheng 185

Relaxation in the $s = \frac{1}{2}$ isotropic Heisenberg chain at $T = \infty$: towards a simple intuitive interpretation
S. Sen 195

Large-scale simulation of the two-dimensional kinetic Ising model
A. Linke, D.W. Heermann, P. Altevogt and M. Siegert 205

Order and localization in reaction–diffusion pattern
D.M. Holloway and L.G. Harrison 210

Some non-linear diffusion equations and fractal diffusion
J. Stephenson 234

Dependence of the friction tensor on the rotation of a frame of reference
K. Miyazaki 248

Mathematical statistical physics

Fusion of dilute A_L lattice models
Y.-k. Zhou, P.A. Pearce and U. Grimm 261

Lorentz symmetry of subdynamics in relativistic systems
U. Ben-Ya'acov 307

Squeezing in resonance fluorescence and Schrödinger's uncertainty relation
H.F. Arnoldus and T.F. George 330

Non-extensive statistical mechanics and generalized Fokker–Planck equation
A.R. Plastino and A. Plastino 347

Field theory of finite-size effects for systems with a one-component order parameter
A. Esser, V. Dohm and X.S. Chen 355

Large fluctuations of local magnetizations in one-dimensional magnets
H. Fujisaka and T. Tanaka 398

Irreversible thermodynamics of a binary mixture of dissimilar hard spheres
P. Goldstein, L.S. García-Colín and E. Piña 411

Magnetic phase diagram of the ferromagnetically stacked triangular Ising antiferromagnet
M.L. Plumer and A. Mailhot 437

Theoretical study of a diluted spin–S ($S > 1/2$) Ising ferromagnet
T. Kaneyoshi 450

Cumulative author index of Volume 221 to 222 463

Index of authors and papers to Volume 222 465
